I am a dedicated **React Front-End Developer** with a passion for crafting innovative and visually appealing web applications. With a strong foundation in JavaScript, HTML, and CSS, I have a proven track record of delivering high-quality code and exceptional user experiences. I am proficient in using state management libraries like **Redux** and **Context API**, and I am always **eager to learn new technologies** and best practices. I am excited to **contribute my skills** and enthusiasm to a dynamic team and work on challenging projects.

📁 Professional Experience

Software Engineer, Atos

12/2019 – 12/2022

Pune, India

- Developed reusable React components for increased maintainability.
- Improved UI performance by strategically addressing bottlenecks.
- Transformed designs into functional and polished code.
- Supported product development through collaboration and issue resolution.
- Managed work prioritization and execution within an agile team environment..

📁 Projects

Reshimgath Matrimony ✕

Built a responsive user interface for the Reshimgath Matrimony web application using React JS within the MERN stack. **Implemented** features that **ensured** a seamless user experience across different devices.

Invoice Generator ✕

Developed a modern, efficient invoice generator using JavaScript, HTML, CSS, and Fireship. **Leveraged** Google Authentication, Firebase, and Material Design **to create** a secure, intuitive, and visually appealing invoicing solution.
